◎Insert the keys to unlock/lock your door

App Wi-Fi Instructions

The lock is compatible with a Bluetooth Wi-Fi gateway (sold separately). To
enable this functionality, you can search for Smart Wi-Fi Gateway and buy
it on www.amazon.com

Note: Refer to the instructions that come with
the Wi-Fi Gateway for more thorough information
about how to set up and operate the device.
◎Unlock by touching the little button
◎Lock by long-pressing the same lock
button with Bluetooth local controls enabled

Other Functions

Alarms

Anti-theft Alarm: Once someone enters the passcode incorrectly five times, it will lock for 5 minutes, and no one can get in, even if you enter the correct passcode..

Low Voltage Alarm: Once the batteries are almost dead, this smart lock will send an alert, and if you forget to replace the batteries before they are dead, you can use USB backup power to power it (at the bottom of keypad).
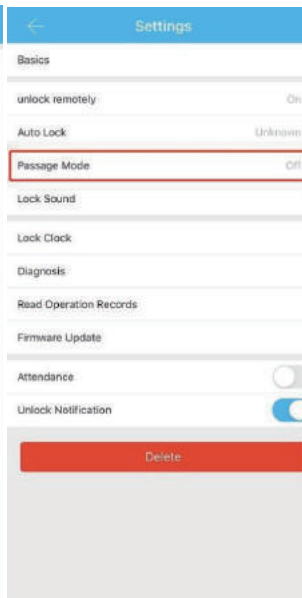

Security Lock

The Security Switch is under the knob, and only the Manager Passcode can unlock when you switch it to ON. It also can't be locked through the keypad.
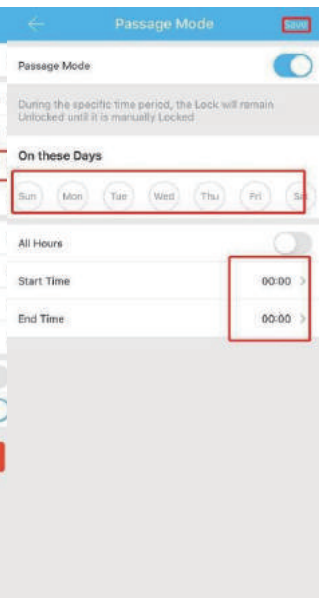

Part 3   Passage Mode

During a preset duration, this smart lock will remain unlocked until it is manually locked once Passage Mode is activated
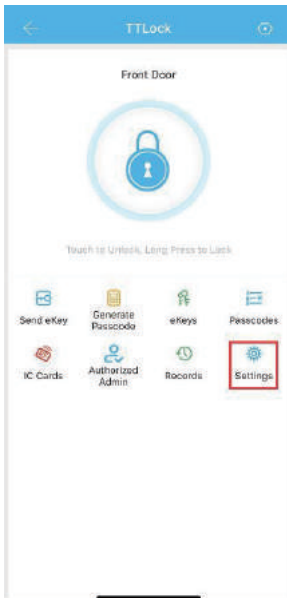

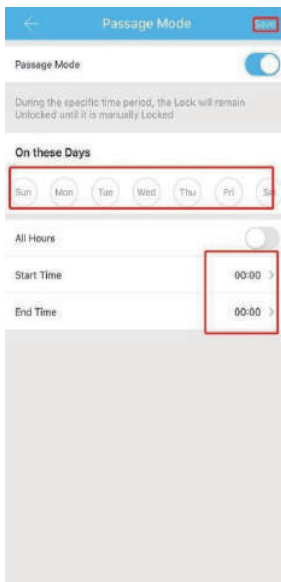

Click 'Settings'   Click 'Passage Mode'   Activate Passage Mode

Select period and click 'Save'

Warranty

You will be 100% satisfied. We provide a refund 30 days after purchase and 90 days to replace the product regardless of the issue. E-mail us with your order information to learn more.
